

ZD4

Dumper rear way tipper

ZD4

Durable truck dumper with the highest load capacity

Our ZD4 is the fourth generation dumper. With smart construction solutions and material selection, we have optimized the weight and stability. That makes it stylish, smart and light.

With the probably lowest overall height on the market, it also sits more neatly on the chassis. The streamlined design, where all parts form a functional unit, together with the raised bottom plate, gives it extra high performance.

The ZD4 is the truck dumper for the toughest jobs.

PRODUCT BENEFITS

- 20 percent less weight, provides better load capacity and reduced fuel consumption.
- Hardox 500TUF - the new generation wear plate increases the service life by 40 percent.
- Swedish-made with a focus on quality, stability and durability.
- The market's lowest building height - 340 mm.
- Functions and smart details for better user-friendliness.
- Robot welded dumper body.
- Available in several models and with a large number of options.

Dumper rear way tipper

Specification example

Length from 4400 mm with 100 mm length intervals.

Height from 900 to 1400 mm with 100 mm intervals.

Width inside 2380 mm. External width 2550 mm.

Bottom 5, 6, 8 or 10 mm thickness of high-strength quality steel Hardox 500TUF with longitudinal profiles prepared for exhaust gas heating.

Sides 4, 5, 6 or 8 mm thick in high-strength steel Hardox 450.

Construction height from upper edge of chassis frame to lower edge of bottom plate 340 mm.

Cab protection steel, screwed.

Automatic tailgate hydraulic operation, height 400 mm.

Spreader gate according to optional list.

Tipping cylinder under- alt. front-mounted hard-chromed telescopic cylinder.

Subframe of equal-sided cold-bent U-profiles reinforced with cross braces in the rear part. Tipping axle for rear tipping.

Ladder on left and right side.

Surface treatment blasted and primed. Surface treatment according to C4High ISO12944.

Characteristics

The **bottom** is bent up 45 degrees to the side for maximum strength and high wear protection.

Top profile with a 30 degree angle.

Automatic tailgate with self-locking device and stop at horizontal position.

Cab protection in a stylish design for an excellent fit against the cab. Cutout for vertical exhaust pipe with cover plates. Integrated handle.

Protective plate for the hinge to spreader gate.

Low weight for maximum load capacity.

Other options

More options see separate product sheet for ZD4.

Models of ZD4 see separate product sheets for two-way tippers ZD4-M and ZD4-Z, combi ZD4-K and automatic cassette ZD4-KA.
