

ZD4-LV

Hooklift dumper

MADE IN
SWEDEN

ZD4-LV

The hooklift dumper with the highest load capacity

Our ZD4-LV is based on our standard dumper ZD4. With smart construction solutions and material selection, we have optimized the weight and stability. This makes it stylish, smart and light.

The streamlined design, where all parts form a functional unit, together with the raised bottom plate, gives it extra high performance.

The ZD4-LV is the hooklift dumper for the toughest assignments and the heaviest loads.

PRODUCT BENEFITS

- High load capacity.
- Low self-weight results in reduced fuel consumption when empty.
- Hardox 500TUF - the new generation high-strength steel increases the wear resistance by 40%.
- Swedish-made and robot-welded with a focus on quality, stability and durability.
- Functions and smart details for better user-friendliness.
- Stylish design with a construction that facilitates maintenance.
- Surface treatment for the highest finish and corrosion resistance.

Hooklift dumper

Specification example

Internal length from 5200 mm to 6400 mm.

Internal height from 900 mm to 1400 mm.

Width inside 2380 mm.

External width 2550 mm.

Bottom 5, 6 alt. 8 mm thickness of high-strength quality steel Hardox 500TUF.

Sides 4, 5 alt. 6 mm thickness in high-strength steel Hardox 450.

Cab protection 5 mm of high-strength steel.

Subframe according to standard SS 3021.

Automatic tailgate pneumatic actuation, height 400, connection via duomatic.

Ladder on left and right side.

Surface treatment blasted and primed. Varnish according to C4High ISO12944.

Characteristics

The bottom is bent up 45 degrees to the side for maximum strength and high wear protection.

Railing with a 30 degree slope angle.

Automatic tailgate self-locking with stop for horizontal position.

Cab protection in a stylish design for an excellent fit against the cab. Cutout for vertical exhaust pipe with cover plates. Integrated handle.

Protective plate for the hinge to tailgate.

Other options

Automatic tailgate 250 mm.

Automatic tailgate hydraulic operation.

Cab protection in steel. Demountable.

Spreader gate in aluminium, front hung.

Spreader gate in aluminium, openable as a door.

Protection for lower side profile on dumper, in aluminium.
